Normally it presents no problems, but today's widespread use of broad-spectrum antibiotics, contraceptive pills, and steroids, as well as a sugar-rich diet, can cause a proliferation of this parasitic yeast. This can often be the root cause of a wide variety of problems such as depression, anxiety, irritability, bloatedness, heartburn, tiredness, allergies, acne, migraine, cystitis, and menstrual problems. Leon Chaitow, using the latest research and his own clinical experience, shows how to determine if yeast is your problem and provides a comprehensive, non-drug program for its control.
