

Astronomical Energy Resources, Value, and Lifestyles (Paperback)

By Horace Crosby

Createspace, United States, 2012. Paperback. Book Condition: New. 279 x 216 mm. Language: English . Brand New Book ***** Print on Demand *****.The author points out that, because we live in a solar system, there are virtually unlimited astronomical sources of power available to us. He predicts that we will eventually have to build enormous mechanisms to gather, store, transform, use, buy, sell, revitalize, and save these cosmological energies. He insists that we will be able to make much more valuable uses of the energies like the heat of our Sun, the tidal forces our Moon produces, and the energies of motion that come from the spinning around of our Earth at 1,000 mph at the Torrid Zone, as examples, when we use these massive mechanisms. Crosby contends that if a big lie exists, it is that value is decreasing more and more on the Earth, and we are using up all of our resources. This is simply not true. Not only that, but the opposite is the real truth. We are lucky to have star system resources, capable of providing us with so much energy that we can make the Earth be as we want it to be, with...
