# VARIABLE SELECTION BY REGULARIZATION METHODS FOR GENERALIZED MIXED MODELS

Cuvillier Verlag Dez 2011, 2011. Taschenbuch. Book Condition: Neu. 208x148x25 mm. Neuware - A regression analysis describes the dependency of random variables in the form of a functional relationship. One distinguishes between the dependent response variable and one or more independent influence variables. There is a variety of model classes and inference methods available, ranging from the conventional linear regression model up to recent non- and semiparametric regression models. The so-called generalized regression models form a methodically consistent framework incorporating...
