PeePee Publishers, 2006. Softcover. Book Condition: New. First edition. This book is designed to help medical students assess their knowledge of basic medical sciences in preparation for MAHE as well as USMLE exams. The overall format of these tests has been designed to parallel the actual examination. This home-study course consists of 2000 multiple choice questions and answers with detailed explanations. The questions are arranged in 2 sections. Section-I contains 500 questions with answers arranged in a subject-wise manner. This will help the student to get the hang of the exam format when he is going through the textbooks. Section-II contains 3 sets of 500 randomly intermixed, broadly based questions, integrated to simulate the format of the official examination. I have designed the explanations to reinforce and supplement the information tested by the questions. Free updates and discussion forums set up at To develop test-taking skills, you must actively practice answering multiple choice questions. Do not attempt to sit for the exams without practising answering multiple choice questions. Responding to questions similar to those encountered on the examination is invaluable for preparation. The difference between the test-wise individual and the unsuccessful test-taker is less often intelligence and more often how organized the learning. Printed Pages: 424.
