SPS Apr 2015, 2015. Taschenbuch. Book Condition: Neu. 220x150x7 mm. Neuware - Who has been fascinated by the mere sight of the pyramids to finally be troubled by the riddle of the technique of their construction Everyone I think! That is why many scientists have tried to discover the technique used by the pharaohs to build such unequalled wonders of architecture which were never been rebuilt while the tools and means that have been used were rudimentary because Egypt had just come out of the Neolithic! The book I propose here is based on a patented technique (by WIPO) that responds in details to questions such as: how did they brought up the stone blocks so high Or, how did they maintained themselves on the pyramid for carving the facades Or, how have they drawn a perfect square floor of 230 m which sides are directed toward the four directions without compass or astrolabe Or else,how have they could build the bent pyramid Because it is far from being a roof collapse! To finally explain how they have could build pyramids without measuring tape, pulley or wheel and solve many other technical problems of building Khufu's pyramid! Good reading, because you are going to find the answers to what have always tormented you. and even more! 112 pp. Englisch.
